CO4CRT12MCQ - QUANTITATIVE TECHNIQUES FOR BUSINESS-II

Answer **all** questions.

All questions carry equal marks

Put a tick mark [✓] against the correct answer

1. Name the type of correlation in which value of both variables under study moves in the same direction?

   (a) Positive Correlation (b) Negative Correlation

   (c) Partial Correlation (d) Simple Correlation

2. When correlation is expressed mathematically the value of perfect correlation will be

   (a) Zero (b) 1

   (c) Either + 1 or – 1 (d) Between + 1 and – 1

3. Coefficient of concurrent deviation is denoted by

   (a) cd (b) rc

   (c) Kc (d) Ke

4. Regression co-efficient of Y on X is known as;

   (a) byx (b) bxy

   (c) bxx (d) byy

5. If the plotted points in a scatter diagram lie from upper left to lower right, then the correlation is,

   (a) Positive (b) Negative

   (c) Zero (d) None of these

6. Regression coefficient is the constant value multiplied to the _____ in a given relation.

   (a) Independent variable (b) Extraneous Variable

(c) Dependent Variable (d) None

7. In an index number, the year for which the comparison is made is known as

   (a) Current year (b) Base year

   (c) Normal year (d) Actual year

8. Value, in a Value Index Number is

   (a) Sum of quantity and price (b) Sum of Quantity

   (c) Product of prices (d) Product of quantity and their prices

9. Index of current year price based on base year price is known as

   (a) Weighted average (b) Current year Price

   (c) Quantity Index (d) Price Index

10. Laspeyrs formula does not obey

    (a) Factor reversal test (b) Time reversal test

    (c) Both (d) None of these

11. Items contributing to consumer price index numbers are generally brought under _____ major groups.

    (a) Two (b) Three

    (c) Four (d) Five

12. Fisher's ideal index number satisfies

    (a) Only Time Reversal Test (b) Only Factor Reversal Test

    (c) Both Time Reversal Test and Factor Reversal Test (d) None

13. The aggregate price index that uses base year quantities as base is:

    (a) Paasche's Index (b) Fishers Index

    (c) Laspeyre's Index (d) None

14. _____ is concerned with the measurement of price changes over a period of years, when it is desirable to shift the base

    (a) Unit test (b) Circular test

    (c) Factor reversal test (d) Time reversal test

15. The more collection in a KSRTC bus at the occasion of a particular festival is related with

    (a) Secular trend (b) Irregular variation

    (c) Seasonal variation (d) Cyclical variation

16. Probability was brought into the shape of theory first by

(a) Galileo (b) Pascal

(c) Cardon (d) Thomas Bayes

17. Tossing a coin is an example of a

(a) Random experiment (b) Non random experiment

(c) Either (a) or (b) (d) Both (a) and (b)

18. A card is drawn from a well shuffled pack of cards. The probability that it is a card of spade is

(a) 1/2 (b) 11/49

(c) 1/4 (d) 13/51

19. _____ probability is also known as personalistic theory of probability.

(a) Classical (b) Relative Frequency

(c) Subjective (d) Axiomatic

20. _____ is a point of reference in comparing various data describing individual behaviour.

(a) Sample (b) Base period

(c) Estimation (d) None
