QP CODE: UGH/MOD/09/10/2026 Roll No : .....

MAR AUGUSTHINOSE COLLEGE, RAMAPURAM

UG (Honours) BCA Degree MODEL EXAMINATION, OCTOBER 2026

Third Semester

CORE COURSE - MG3CCRBCA202 – SOFTWARE ENGINEERING

Maximum Marks: 50 Time: 1.5 Hours

Remember (K), Understand (U), Apply (A), Analyse (An)

Part A

*Answer **all** questions. Each question carries 2 marks.*

1. What is the difference between Reactive and Proactive Risk Strategies? [U][2]
2. Distinguish between plan-driven and agile approaches. [U][1]
3. What do you mean by the evolving role of software? [U][1]
4. What is the difference between milestones and deliverables? [U][2]
5. List any two Scrum artifacts. [K][1]
6. List any two key practices of Extreme Programming (XP). [K][1]
7. What do you mean by requirement specification? [K][2]
8. Explain the difference between black – box and white – box testing. [U][3]
9. What do you mean by the design concept "modularization"? [U][3]
10. What do you mean by Software Quality? [K][3]

(2x10=20)

Part B

*Answer any **three** questions. Each question carries 5 marks.*

11. Compare Scrum and Extreme Programming (XP). [An][3]
12. Compare application-composition model and early design model in COCOMO II. [An][2]
13. Describe the importance of metrics for design models. [U][3]
14. Explain the structure of a requirement document. [U][2]
15. Describe the components of layered technology in software engineering. [U][1]

(5x3=15)

Part C

*Answer any **one** question. Each question carries 15 marks.*

16. Explain the project plan and planning process in plan-driven development. [U][2]
17. Analyse the debugging process in detail. Explain the major steps involved in debugging and its major objectives. [An][3]

(15x1=15)
